Sana Batool

CS'28 | Automation | AI agents developer

Pakistan

Summary

I'm a Computer Science student (CS'28) with a growing passion for web development, AI/ML, and open-source technologies. I also have a strong foundation in C++ programming, with hands-on experience creating 2D games that deepened my understanding of logic, object-oriented design, and creative problem-solving. I recently applied to Google Summer of Code 2025, which gave me experience in writing technical proposals and exploring system-level programming (eBPF + C). Always curious, always building — I'm excited to keep learning and contribute to meaningful tech projects. Let's connect!

Experience

Google Developer Group on SZABIST ISB

Technical Team Member

October 2025 - Present (5 months)

- Collaborated with fellow volunteers to organize tech events and hackathons, fostering a vibrant learning environment for students.
- Assisted in mentoring students, providing guidance on technical projects and event participation.
- Engaged with the local tech community to promote events, enhancing visibility and participation.

AI-Shifa Trust Eye Hospital

AI Intern

June 2025 - September 2025 (4 months)

Rawalpindi, Punjab, Pakistan

- Assisted in developing machine learning and deep learning models for image preprocessing.
- Learned about disease detection using convolutional neural networks (CNN).
- Gained hands-on experience in AI technologies while working at AI-Shifa Trust Eye Hospital.

Education

SZABIST University - Islamabad Campus

· (2024 - 2028)
